Good morning (b) (6)

On, or around February 11, 2009 you called the EPA Region 6 office in Dallas, and you had a conversation with my Section Chief, Mr. Philip Dellinger, regarding the TexCom proposed injection operations in the Conroe field in Montgomery County. At the time, Mr. Dellinger informed you that this office will continue to monitor the permitting proceedings and would get in touch with you as additional information becomes available.

Per Mr. Dellinger's recommendation, I take this opportunity to let you know that we continue to monitor the activities regarding TexCom's application, and have learned of the possibility that a hearing may take place late in July, 2009. However, we do not have as yet clear details on how far the operator may have gone towards satisfying the ALJs recommendations that followed the contested case hearing of December, 2007, or on any related actions that TCEQ may have taken to date or may plan to take in the future.

We look forward to the opportunity to talk to you again, as we learn more on the progress of these permitting proceedings. Best regards,

Jose Eduardo Torres - 6WQ-SG
EPA, Region 6
